

Fabric Appliqués and Engraving *with a laser*

Epilog's laser systems have revolutionized the way that fabric companies are creating custom appliques. As the laser cuts the fabric, it will sear the edge of the material, stopping the fabric from fraying on the edges.

From cotton, to suede, to twill, to nylon, a laser system can cut and engrave them all!

Cut Intricate Fabric Appliqués · Cut intricate appliques in-house from multiple layers of twill, all in one step.

Engrave Fabric with Logos and Designs · Etch any image on twill, cotton, microfibers, leather and more.

Expand Your Business · Add to your business the ability to create professionally engraved awards, further expanding your product line.

Let's get started!

What are the Benefits of Laser Cutting Fabric?

- The highly accurate precision of a laser beam provides you with greater consistency and control.
- The cut edge is cleanly seared by the laser.
- You'll see increased speed and higher cutter throughput than ever before.
- The laser creates an extremely small cut width, allowing you to show off your most precise, detailed designs.

Laser Engraving and Etching Fabrics

An Epilog Laser allows you to take your fabric or embroidery business to the next level by offering custom engraved fabrics.

- Etch any image on nearly any type of fabric.
- Create your image in any graphic software and simply print it to the laser.
- You can laser etch cotton, twill, microfibers, leather, and much more!
- Or you can even branch out in to wood, acrylic, plastic, marble, and many other engraveable materials.

From Desktop to Large Format Lasers

At Epilog, we design a range of laser systems to meet varying needs. From the entry-level 16" x 12" (406 x 305 mm) Epilog Zing 16 to the top-of-the-line 36" x 24" (914 x 610 mm) Legend 36EXT, we proudly design, develop and manufacture all of our laser systems in Golden, CO.

Let us show you how easy it is to get started with an Epilog Laser! To set up a hands-on demonstration of the laser in action, contact us today at +1 303-277-1188.
