# Pressure Foot for Colombo Spindles

## Description

High vacuum, low volume chip/dust extraction Pressure Foot suitable for use with most Shop Vac systems. Provides local hold-down pressure which is particularly useful for cutting small parts or very flexible material. New design allows fitting with all Colombo spindles including 5 and 10 hp

Right Pressure Foot Shown

## Installation

1. Slide Pressure Foot over the spindle and lock with Hold-Down Clips to secure on the Z-Plate.
2. Connect air supply feed line to valve on top of carriage.
3. Slide 1 1/2" vacuum hose over exhaust outlet and

Hold-Down Clips

## Features

- Left and Right versions to fit multiple spindle Setups.
- Shipped with two pressure donuts allowing choice between extra small part hold-down or higher flow extraction.
- Removable clear top plate allows for easier cleanup and direct placement of misting nozzles onto tool bit.
